- How to Play Pachi-slot -

"The First Pachinko"

"The First Pachinko" is an introduction to Pachinko and Pachi-slot written for novice players. After reading these instructions you should understand the basics of how to play. For 1,000 Yen, even beginners can enjoy playing the games of Pachinko and Pachi-slot. We advise novice players to start off using the game machines marked "遊パチ (Yu-pachi)".

For more information, please visit this website:
<http://www.hajimete-pachinko.jp/pc/en/>

We recommend novice players begin playing "Five-Yen Pachi-slot"

In Pachi-slot there are categories like a Five-Yen coin called "Five-Yen Pachi-slot", and a Twenty-Yen coin called "Twenty-Yen Pachi-slot". We recommend novice players play the "Five-Yen Pachi-slot" for more and longer plays.

Which type of Pachi-slot is best for you?

There are three types of Pachi-slot. You may experiment to find out which type is right for you.

Prompt Mode

"Prompt Mode" means that when the jackpot is hit, lights and objects on the machine move around to show that the player has hit the jackpot. We recommend novice gamers play in this mode.

RT Mode (Replay Time Mode)

"RT Mode" is the most popular mode and is geared for intermediate level players. There are different kinds of categories, machines and ways of playing. Please see the instructions concerning the location of the game machines.

ART Mode (Assist Replay Mode)

In the "ART Mode", in addition to hitting the jackpot, the game tokens can be increased. However, because it involves betting, we recommend that advanced players use this mode.

How to play Pachi-slot

Now let's learn how to play Pachi-slot step-by-step.

1

Please come to the Pachinko parlor early! If you have a lot of personal belongings you may store them in a locker (but some parlors do not have storage lockers).

2

Please select your game machine.

3

After sitting down at a game machine, please deposit money to get game tokens.

4

When you deposit some bills, game tokens of equal value will be dispensed.

7

Beginning from the left, press the buttons in sequence and the pictures will stop.

5

Please deposit the game token into the slot. You may deposit a maximum of 50 tokens. Most game machines require three tokens to play one game.

8

If you hit the jackpot, the display screen and lights will indicate with "Bonus Confirmed". At this time you want to try to match up the spinning pictures. If you don't understand you can call for an attendant.

6

If you pull the handle the pictures begin to spin and change.

9

If the pictures match up then you've hit the jackpot and the bonus play will begin.

10

During bonus play, a lot of game tokens will be dispensed (the operations and displays are different based on the type of game machine). If you have any questions please call for an attendant.

11

Please place all the dispensed game tokens into the box.

12

When the game is over please press the "Call" button to have the attendant help you count the game tokens.

13

Help you tally the game tokens.

14

After helping you tally the game tokens, you will get a small card which indicates the amount of game tokens.

15

Finally, bring the small card to the prize counter and exchange it for prizes.
